We have a team whose job it is to carry out quality control of the membership on our platform and they vet those applying to become members, monitor their behaviour and ask for proof of ID and official documentation when verifying their income. We reserve the right to automatically blacklist any user who violates our community guidelines.

Specifically, we have a state of the art AI system that verifies a user's profile picture with a real-time selfie at the application stage. This takes just 2-3

seconds. On the 5% of occasions that our system itself cannot make a decision

on the verification, our human moderators will verify it instead.

Income verification, which is optional, requires the applicant to upload proof of income including tax returns, statements of assets, and official bank statements, all of which are immediately erased following successful or unsuccessful verification.

Additionally, our system automatically flags profiles when unwanted content or pictures has been shared or improper messages have been sent. If it has violated our guidelines the user will be removed permanently. In severe cases some info will be added to a blacklist which prevents the person from creating an account on LUXY again.
